

An ecological approach to cultural learning explores...

EMERGENCE

How is a child's
cultural life formed
and shaped?
Where does it begin?

EVOLUTION

Is there such a thing
as cultural evolution?
If so, what role do young
people play in it?

GROWTH

What does a child's
cultural growth mean?
How are growth
and development
nurtured?

RESILIENCE

How is individual cultural
confidence promoted?
How does the system of
cultural learning develop
its own resilience?
