

Design a character for my VR Video Game

Jason & his Argonauts

Your Task

As you will remember from my workshop with you, earlier this year, you created art using an iPad. Now I want you to....

1. Create a character for my video game.

2. The character must have a disability.

3. The disability is their superpower. So celebrate that in your design

4. Take a look at my website and look at my sculptures to give you an idea.

5. Give the character lots colour and add lots of detail

6. You don't have to use an iPad to create your character. You can use pencils, paint, mixed media...anything you like!

7. Design, draw, paint...But have lots of fun
